Simplify your expense tracking and reporting with an easy-to-use mobile app

ELMO

ELMO's Expenses solution can automate how you manage business expenses. Submitting, approving, and reporting expenses is simplified through our intuitive digital platform. Multi-level workflows can be configured to meet your needs, providing automatic compliance and custom reporting to ensure control and visibility.

Our solution allows employees to submit claims in seconds with digital receipts auto-generated by the optical character recognition (OCR) receipt scanner. Admins can then easily approve, track and report expenses at the touch of a button.

Mobile expense app

Manage expenses on the go. Users can snap a picture of their receipt and easily create a claim in seconds. Admins can review, approve, reject and track expense reports via desktop or mobile.

Corporate card matching

Intelligent Receipt Matching automatically pairs receipts to their corresponding card transaction(s), reducing administrative work for quick and accurate expense management.

Corporate credit card reconciliation

See all of your organisation's corporate spend in one place for improved control and visibility over outstanding corporate spend.

Why you'll love it

Build your specific company expense policies into ELMO Expenses to provide automated compliance. Compliance for users is easy with policies defined at the point of entry, and out-of-policy claims are eliminated through active policy enforcement with automatic alerts.

Enjoy an automated process for claiming and managing petty cash in real-time through a mobile app, eliminating the need for paper receipts. Admins gain greater visibility and control with integrated pre-approvals to avoid overspending.

Intelligent Receipt Matching is our cutting-edge technology that automatically pairs receipts to their correct card purchases. This feature eases user and admin workflow to provide quick and accurate expense reports for credit card management and reimbursement.

EXPENSES

Efficiency was a deciding factor for me as CFO. We needed to ensure the software was easy and seamless for our staff to use and that's why we went with ELMO.
